

The New Build Experience

Working in Collaboration

Back in 2016, Farrans Construction started a project to build a new £26.5 million school for one of our customers Chichester Free School, who were moving from their temporary site.

What we did

Nviro started a range of different cleans at the new Chichester Free School site in July of this year when the project was nearing completion. 13 of our cleaning operatives, as part of a specialist team, worked over the next couple of months to carry out builders cleans as well as a sparkle cleans at the new School site. This allowed Nviro to provide a flexible service for Farrans, providing cleaning staff to support their activities on a daily basis so that they were able to snag building work in a quick and timely manner.

Other activities that Nviro carried out throughout the construction of the new site at Chichester Free School was consistently providing external grounds clearance as well as internal and external window cleaning.

Out and About

Just before the construction of Chichester Free School was completed, Head of People, Hannah Miller, visited the site to see our specialist cleaning team in action, as well as how the development of the School was going. This gave Hannah the opportunity first-hand to see how Nviro operate when providing builders and sparkle cleans and just what a tough but rewarding job this can be.

SHINE

The School is now complete just in time for the new academic year and for the students and building users to **thrive** in a brand new **safe, clean** and **hygienic** school.
