

Reactive Cleaning - Hampshire

The Perfect Partnership

Since May 2018, Nviro have been working closely with sister company Mountjoy by completing specialist cleaning tasks on a variety of building projects all over Hampshire. These sites range from working in leisure centres, care home, student cribs, hospitals as well as navy establishments.

Experts in cleaning

Grounds Work

Ensuring that the grounds are tidy with no waste surrounding the areas.

Window Cleaning

The final touches so that there are no marks and the glass is **SHINING**.

Builders Clean

This is carried out when the building works are completed.

Sparkle Clean

This is carried out once all the snagging has been completed. The final clean.

The Outcome

To help fulfil these tasks, Nviro had to utilise different types of specialist teams, this included mobile teams, using local resource, the skill-set of the specialist teams and the expertise of area management and supervisors.

Working in collaboration has allowed for Nviro to fulfil the specialist projects assigned. Mountjoy could then complete their building and maintenance projects resulting in a **safe**, **clean** and **hygienic** environment.
